

**COLLEGE OF VOCATIONAL STUDIES
(UNIVERSITY OF DELHI)**

23.07.2020

NOTICE

SUBJECT : How Coronavirus is being fought by students of Bolt IoT using innovative technologies

Solving challenges of Coronavirus with Bolt IoT and ML

We are proud that many students have started using IoT and ML to build systems and solutions for these trying times. Here are a few innovative projects our students have built using the Bolt IoT platform to battle COVID-19!:

1. [Sanitization Reminder using Bolt IoT](#): This system built by one of our students ensures that every person who enters a room uses the sanitizer. The system triggers an alarm if any new entrant does not sanitize their hands.
2. [Bolt IoT Quarantine Survival Robot](#): This robot built by another student helps quarantined patients perform basic tasks without coming into contact with a human, thus arresting the spread of the virus.
3. [Contactless lighting using Bolt IoT](#): Using this project, our student has built a contactless lighting system to limit touchpoints that could be potential risks for the transfer of the virus and infections.

These projects have been possible since these students have undertaken our Bolt IoT and ML training. It has been our honour and privilege that we could guide them in their journey. We would also like students of College of Vocational Studies to use their skills and build their own projects using IoT and ML to solve problems of humankind. Please find details about our scholarship program below.

The Bolt IoT and ML Scholarship:

Earlier, we had shared with you an email regarding the IoT and ML scholarship; I hope you have already shared the details with your students so that they can avail the benefits.

- As the first step to participate in the scholarship, students have to answer the scholarship test by visiting <https://info.bolttiot.com/iotmlscholarship>

- The qualifying students will then be trained in the concepts of IoT and ML by our team of developers via online video training.
- Do note that the **last date** to avail the scholarship is **Tuesday, 28th of July 2020** so do share the details with them soon if not yet done so. The email has a subject line: Scholarship for students of College of Vocational Studies. **In case you have not received the email about the 'Bolt IoT and ML Scholarship Test' then please reply to this email**, and we shall send the details again to you.

Please share this email with your students so that they could benefit from the scholarship and gain inspiration from the projects being built by other students.

We are excited and look forward to having students from 'College of Vocational Studies' join the scholarship program. If you have any queries, you may reply to this email or call us on (+91)8881197198 and dial 4 to connect to me. I will be happy to answer your queries.

Regards,
Yeshwant Naik,
DevOps Engineer - Bolt IoT
