Notice

It is in connection with the waste management initiative of the **Green Brigade**, Environment Society of the College. It has been pointed out that the waste is not properly managed before and after the function is over by different societies or cells of the College.

All of us are very particular about maintaining the campus clean & green. Therefore, all the organizers, teachers and students associated with such functions should ensure that any waste generated while preparing for the functions and after the function should be properly disposed off.

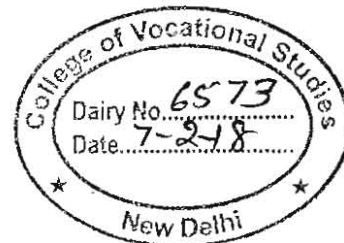

The **Green Brigade** of the College has taken an initiative for waste management. The document prepared by the **Green Brigade** containing objective, how to do this, incentive and the conduct of the survey is enclosed herewith for the reference of everyone.

All the members of Teaching, Non-teaching & students are requested to extend their full cooperation in this initiative.

Let's all come together to have **Clean and Green campus**.

# GREEN BRIGADE'S WASTE MANAGEMENT INITIATIVE

## **Aim:**

To spread awareness regarding the importance of waste management.

## **Objective:**

The idea here is that all the societies of CVS will be required to manage their waste in every event they organise. This is because a lot of resources are wasted in every event organised by any of the societies and it is time to find some solution to it. It is important for us to ensure that every society makes this a habit in future and it doesn't become a mere obligation. Since no one has taken such an initiative before, it is important for us to take a step forward and bring a change.

## **How to do this:**

- We can do this by appointing a few Green Brigade members who will supervise every society's event and rate their performance based on their waste management.
- A standard survey sheet will be prepared where every society's performance will be rated on different aspects.
- Every society will be informed regarding this initiative beforehand itself. They will also be informed about the basis on which their performance is to be judged and the incentive to do it.
- Every society will be required to manage their waste on their own in the most productive way possible. Green Brigade volunteers will not take responsibility for managing the waste. They will only be responsible to keep a check on the waste disposal and judge the performance.
- Green Brigade volunteers will be trained beforehand itself so that judgement is standardized across all events and no biasness exists.

- The aspects on which the societies will be judged are as follows:-

- 1) Cleanliness
- 2) Waste segregation
- 3) Knowledge regarding waste management
- 4) Waste disposal
- 5) Focus on waste management
- 6) How organised the event is regarding the materials used
- 7) How efficiently are the materials used

A section for comments will added so that the volunteers can add anything interesting they have observed.

All aspects will be judged out of 10 after the event gets over. All volunteers will take a collective decision and provide a judgement.

### **Incentive:**

- Corporate Social Responsibility is a very crucial element of any organisation.
- Since every society tries to work professionally and replicate any corporate firm, CSR should be enough incentive for all the societies.
- The society with best waste management performance can get a special mention in the college magazine under Green Brigade's section.
- We can also offer certificates regarding the same.

We suggest to forward this message to all the societies as a notice from the college administration and roll it out as an inspection which will be regulated by Green Brigade.
