PROJECT RAAH

Started in 2017, Project Raah is the harbinger of hope, health and happiness for several communities. October 2020 marked the completion of 3 years of Project Raah. What started with just one cobbler in South Delhi, is now a strong community of 25 cobblers and 2 footwear manufacturing companies, along with various stakeholders who work with team Enactus to uplift the beneficiaries.

SHOE DONATION DRIVE

In the years 2020-21, this Greensoles collaboration added another feather to the cap making us all the more proud in Project Raah. In this Greensoles collaboration, we had Mr. Shreyans Bhandari and Greensoles is the vision partner for Project Raah. Green- soles is working on the same lines as us and they are giving life to discarded foot- wear. Raah will be conducting shoe donation drives in the college campus and nearby areas to help them in the same. Collaborating with Green Soles which works on similar objectives was indeed a positive step. Over 20 students became a part of this initiative.

PROJECT ABYAAN

Project Abyaan is an initiative to utilize the full potential of Used cooking oil. Under project Abyaan, we have a well-established oil-bank network and used cooking oil is collected from these eateries and is supplied to our communities which are further trained in making the soaps out of the same. Hence, for expanding our project vision and acquiring more used cooking oil, we pitched many different eateries and hence bought 6 more eateries to embark with us on this journey, providing us with used cooking oil. This would enable us to make more soaps. Around 15 students were a part of this project.

PROJECT ABYAAN: SAMARPAN NGO

Under Project Abyaan, we successfully collaborated with Samarpan NGO. We will teach soap making to their community. Project Abyaan aims to address the problem of disposal of used cooking oil, which usually ends up blocking drainage pipes or sewers, contaminating landfills leading to soil pollution. Hence we came up with this project idea of manufacturing soaps out of UCO and further expanding this initiative to communities like Samarpan NGO gives our project a boost and empowers women communities to be self sufficient.

PROJECT EHTIYAAT: PAAPOS

Enactus CVS collaborated with Paapos for the door to door delivery of about 300+ Covid19 Kits to the unprivileged people. This initiative was a part of Project Ehtiyat. We provided protective equipment kits adhering to the guidelines of W.H.O. at affordable prices to contain the proliferation of COVID-19. In this view, to cater to the needs of all the sections of the society, we proffered two safety kits; Suraksh-Kit and Premium Kit.

Later the initiative got converted into Project Ehtiyat which aims to attenuate the critical issue of single-use plastic waste that ends up in the ocean while empowering traditional handloom communities by making them a key element of this project.

PROJECT EHTIYAAT- NGO SUGADH

Enactus CVS collaborated with Sugadh NGO for the supply of masks and with local retailers for the supply of sanitisers and soaps. This initiative was taken under Project Ehtiyaat that started as a collaborative initiative of Enactus College of Vocational Studies and Enactus SGTB Khalsa in the year 2020 that aimed to promote and instill the practice of hygiene to ensure safety during the global pandemic. Hereby, We provided masks to the needy by collaborating with Sugadh NGO and ensured supply of sanitisers and soaps catering to hygiene and adhering to the guidelines of W.H.O. Later the initiative got converted into Project Ehtiyaat which aims to attenuate the critical issue of single-use plastic waste that ends up in the ocean while empowering traditional handloom communities by making them a key element of this project. Around 20-25 students were a part of this initiative.

**The proper aim of giving
is to put the recipients in a state
where they no longer need our gifts.**

THE SOCIAL CIRCLE: TRAINING SESSION

It was one kind of an initiative that we undertook with the marketing department of Enactus CVS. Hereby, we collaborated with 5 Enactus teams, Enactus Dyal Singh, Sri Venkateswara, Khalsa, DCAC and Kalindi College for an insightful speaker session on Social Entrepreneurship and SDGs. With almost 200 members being a part of this session, it was highly interactive and informative. We got to know about various thought processes relating to entrepreneurship and how individuals get motivated to be a part of the same. Learning about the various SDG's gave us a global vision and made us discuss on how to cater to these problems. Combining it all, the social circle was a great success and worth learning experience for all of us. Around 80 students from all the colleges were a part of this initiative.

The Social Circle

TSC'20

An Interactive session on social entrepreneurship and sustainable goals

Monday 30 November, 2020

Organised by:

“Come aboard and be the catalyst of the change that you always wanted to see.”

There were some projects which were researched and worked upon, however they did not come to fruition:

THE PAPER PROJECT

In this project, the main aim is to reuse old, used and discarded paper and newspapers, and convert them into a solid paper base which has multiple utility and is quite promising.

The Gulal Project

A high potential project, this project uses discarded flowers, wasted oils and scents, to make coloured powders and dyes for festive usage. This is completely organic and hence plays a huge role in reducing the chemical based toxic products currently in the market.

The Water Filter Project

Clean water is still a problem in India and this Project is a step in the right direction. This project uses a sugarcane/charcoal/bamboo based model for significant cleanliness of water.

The Composting Project

Kitchen waste in our homes is completely wasted and is dumped into the wastelands, however this waste has a very high potential, the potential of being used as manure. This project will incorporate waste biodegradable products which will be used to create a manure base.

The Plastic Replacement

Ehtiyaat is currently leading a unique approach to plastic reduction and this project will have a two-faceted approach. One will be convert plastic into somewhat utility products by simple changes to the products and the inclusion of bamboo products will also lead the charge against the currently life threatening plastic epidemic.

Toothpaste Tablets

Every household consumes over 10 tubes of Toothpaste each year, multiply that with millions of families and the plastic use here only is literally scary. This project aims to reduce this plastic based approach by making a toothpaste which is actually tablet based, hence doesn't require plastic and is a simpler method for daily use of toothpaste.

ENACTUS CVS participated in and won the following events in 2020-21:

<https://www.instagram.com/p/CDjQdgEA5tJ/?igshid=MDJmNzVkMjY%3D>
